HG CONNEXION KIT

MSRP
49,90€

Choose the optional HG connection kit to enjoy unlimited battery life for your FIVE HG heated gloves. Its cables allow you to directly connect your FIVE HG heated gloves to the cigarette lighter or the battery terminals of your motorcycle. It easily connects to the gloves using the additional female socket integrated into each glove's battery compartment. Each battery gets recharged while you ride.

Compatible only with FIVE HG gloves.

HG USBC DUAL CABLE

MSRP
9,90€

Though one set comes with each pair of FIVE HG gloves, you may find it helpful to have an extra USBC dual cable or need to replace a lost one. It allows you to simultaneously recharge both batteries that come with your FIVE HG gloves in just 4 hours.

Input 5V / 2A.
Output 8.4V DC / 0.6A x2 / 10.1W.
Compatible only with FIVE HG gloves.

HG GLOVE BATTERY

MSRP
39,90€

To replace a dying battery or one you've lost, we offer our FIVE HG batteries as an accessory. The 7.4 V/2.2 Ah batteries charge up completely using the FIVE HG dual charger in just 4 hours.

Voltage:
7.4 V / Capacity: 2200 mAh Current / 16.28 Wh Power. Compatible only with FIVE HG gloves.

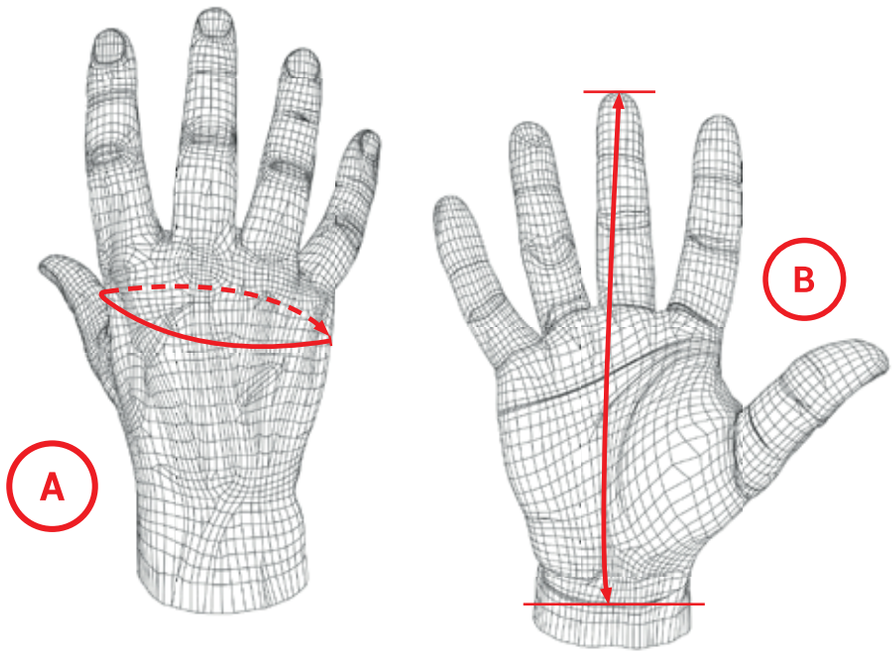
SIZE CHART



FIVE ADVANCED FITS

Because we don't expect the same fit from a competition glove as we do from a glove designed for everyday city riding, or from a glove designed to keep the hand warm in winter, FIVE builds its gloves around 3 types of cut, with varying degrees of fit.

SLIM : The glove is fitted as close as possible to the hand for optimum performance and riding precision. It may require a little effort to put on and take off.

REGULAR : The glove offers a standard fit for comfort and convenience when donning and doffing, for optimum riding sensations.

RELAXED : The glove offers a relatively loose fit for comfort and thermal regulation inside the glove.
